Progression Steps

Textiles – Polyfusion Pencil Case -  
Year 7

## Producing Quality Products

### 6

- The product (pencil case) has been completed accurately and independently.
- A range of tools and equipment have been used accurately when making.
- Shown more understanding of textiles techniques e.g. embroidery and layering when fusing plastic bags to add colour and pattern to materials, applique, beads/sequins.

### 5

- Followed harder instructions when making (pencil case), without help from others.
- Shown more skill when handling and shaping materials e.g. paper and recycled materials.
- Thought about quality checks throughout making.
- Some machine embroidery has been added to the material to add pattern and colour in a creative design.

### 4

- Correct textiles equipment has been chosen and used safely after a demonstration.
- Followed simple instructions when making (pencil case) with only occasional help.
- Made a complete product (pencil case), considering how it will be finished at various stages of making.
- Surface design has been considered.

### 3

- Followed simple instructions when using the sewing machine when supported by others.
- The product (pencil case) has been made with some support, fairly accurately.
- Surface design has been attempted.

### 2

- Followed some simple instructions when using the sewing machine, supported by others.
- The product (pencil case) is incomplete/completed with some errors.
